Senator Theo. G. Bilbo
Poplarville, Mississippi

My dear Senator:

The people of Panola County are very, very anxious to keep the modern hospital now located at the Como Prisoner of War Camp between Sardis and Como for the benefit of the local persons after the war time usefulness of the hospital has terminated.

The hospital is located in permanent buildings and is of the very highest type and latest design in equipment and accessories. ~~which~~ It would certainly be a pity to tear these buildings down and dump the equipment when they could be of so much use to the local area and all of the people in this area will appreciate any thing you can do to assist them in working out some plan by which this local hospital may be used and maintained for the benefit of Mississippians after the war is over.

Please give this your most careful and earnest consideration.

With kindest personal regards, I am

Sincerely your friend,

A. B. Friend
